### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the present invention relates to an apparatus for detecting multiple assertions in a bus efficiently by encoding each of  $N$  bus lines with  $\log_2(N)$  pairs of bit lines. The independent claims 1, 9 and 17 recite an apparatus, comprising:  $N$  bus lines, wherein  $N$  is a natural number;  $\log_2(N)$  pairs of bit lines, wherein each of said  $\log_2(N)$  pairs of bit lines includes a high bit line and a low bit line, and wherein each of said  $N$  bus lines is coupled to one of said high and low bit lines;  $\log_2(N)$  NOR gates, each having at least a first input, a second input and an output, wherein each NOR gate is associated with one of said  $\log_2(N)$  pairs of bit lines, and wherein for each NOR gate, said first input is coupled to said high bit line and said second input is coupled to said low bit line of one of said  $\log_2(N)$  pairs; and a multi-hit line coupled to each output of said  $\log_2(N)$  NOR gates. The PRIOR ART fails to disclose or suggest such an apparatus for detecting multiple assertions in a bus efficiently by encoding each of  $N$  bus lines with  $\log_2(N)$  pairs of bit lines as described in the independent claims 1, 9 and 17, therefore, claims 1-19 are in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
